Management Commentary

Ted Goldthorpe, Chief Executive Officer of Portman Ridge, stated, "We are pleased to report that Portman Ridge delivered net investment income of \$0.70 per share, which is an increase of 4.5% from the previous quarter and exceeded the Company's quarterly distribution. Additionally, during the three months ended June 30, 2024, we repurchased 79,722 shares for an aggregate cost of approximately \$1.6 million, which was accretive to NAV by \$0.03. During the quarter, however, we experienced challenges at certain select inherited portfolio companies, resulting in a decline in NAV and an increase in non-accruals. Despite the challenging quarter, we remain confident in the quality of the portfolio and our ability to generate attractive and sustainable returns for shareholders over the long-term.

Subsequent to quarter end, we amended and extended our Credit Facility with JPM. The new attractive terms, which reduced the applicable margin

from 2.80% per annum to 2.50% per annum, have reduced our overall cost of capital, providing us with further financial flexibility. The new revolving commitment from JPM, which increased by \$85.0 million to \$200.0 million, expands our ability to provide additional capital to our existing portfolio companies as well as provides us with greater flexibility to finance new attractive investment opportunities as they arise.

As we enter the back half of 2024, we want to reiterate our commitment to our shareholders. With our amended credit facility, robust pipeline, and strong balance sheet, we believe we are well positioned to continue executing our strategy and delivering positive returns to our shareholders.”

Liquidity and Capital Resources

As of June 30, 2024, the Company had \$285.1 million (par value) of borrowings outstanding at a current weighted average interest rate of 6.9%, of which \$108.0 million par value had a fixed rate and \$177.1 million par value had a floating rate. This balance was comprised of \$92.0 million of outstanding borrowings under the Revolving Credit Facility, \$85.1 million of 2018-2 Secured Notes, and \$108.0 million of 4.875% Notes due 2026.

As of June 30, 2024, and December 31, 2023, the fair value of investments and cash were as follows:

As of June 30, 2024, the Company had unrestricted cash of \$9.8 million and restricted cash of \$26.8 million. This compares to unrestricted cash of \$20.8 million and restricted cash of \$18.8 million as of March 31, 2024. As of June 30, 2024, the Company had \$23.0 million of available borrowing capacity under the Revolving Credit Facility, and no remaining borrowing capacity under the 2018-2 Secured Notes.

Interest Rate Risk

The Company's investment income is affected by fluctuations in various interest rates, including SOFR and prime rates.

As of June 30, 2024, approximately 88.1% of our Debt Securities Portfolio at par value were either floating rate with a spread to an interest rate index such as SOFR or the PRIME rate. 81.6% of these floating rate loans contain SOFR floors ranging between 0.50% and 3.25%. We generally expect that future portfolio investments will predominately be floating rate investments.

In periods of rising or lowering interest rates, the cost of the portion of debt associated with the 4.875% Notes Due 2026 would remain the same, given that this debt is at a fixed rate, while the interest rate on borrowings under the Revolving Credit Facility would fluctuate with changes in interest rates.

Generally, the Company would expect that an increase in the base rate index for floating rate investment assets would increase gross investment income and a decrease in the base rate index for such assets would decrease gross investment income (in either case, such increase/decrease may be limited by interest rate floors/minimums for certain investment assets).

(\$ in thousands)	Impact on net investment income from a change in interest rates at:		
	1%	2%	3%
Increase in interest rate	\$ 1,764	\$ 3,528	\$ 5,292
Decrease in interest rate	\$ (1,764)	\$ (3,528)	\$ (5,252)

¹ Core investment income represents reported total investment income as determined in accordance with U.S. generally accepted accounting principles, or U.S. GAAP, less the impact of purchase discount accretion in connection with the Garrison Capital Inc. (“GARS”) and Harvest Capital Credit Corporation (“HCAP”) mergers. Portman Ridge believes presenting core investment income and the related per share amount is useful and appropriate supplemental disclosure for analyzing its financial performance due to the unique circumstance giving rise to the purchase accounting adjustment. However, core investment income is a non-U.S. GAAP measure and should not be considered as a replacement for total investment income and other earnings measures presented in accordance with U.S. GAAP. Instead, core investment

income should be reviewed only in connection with such U.S. GAAP measures in analyzing Portman Ridge's financial performance.

² Net leverage is calculated as the ratio between (A) debt, excluding unamortized debt issuance costs, less available cash and cash equivalents, and restricted cash and (B) NAV. Portman Ridge believes presenting a net leverage ratio is useful and appropriate supplemental disclosure because it reflects the Company's financial condition net of \$36.6 million and \$39.6 million of cash and cash equivalents and restricted cash as of June 30, 2024 and March 31, 2024, respectively. However, the net leverage ratio is a non-U.S. GAAP measure and should not be considered as a replacement for the regulatory asset coverage ratio and other similar information presented in accordance with U.S. GAAP. Instead, the net leverage ratio should be reviewed only in connection with such U.S. GAAP measures in analyzing Portman Ridge's financial condition.
